

IN THE CLAIMS

Please amend the claims as follows:

1. (Original) A compound represented by formula (I)

wherein R represents a methyl group or an ethyl group, R¹ represents a hydrogen atom, a chlorine atom, a hydroxyl group, or a methoxy group, R² represents a hydroxyl group, or R¹ and R² taken together form an epoxy ring structure.

2. (Original) The compound according to claim 1, wherein in formula (I), R represents an ethyl group, and R¹ and R² taken together form an epoxy ring structure.

3. (Original) The compound according to claim 1, wherein in formula (I), R represents a methyl group, and R¹ and R² taken together form an epoxy ring structure.
4. (Original) The compound according to claim 1, wherein in formula (I), R represents an ethyl group, R¹ represents a chlorine atom, and R² represents a hydroxyl group.
5. (Original) The compound according to claim 1, wherein in formula (I), R represents a methyl group, R¹ represents a chlorine atom, and R² represents a hydroxyl group.
6. (Original) The compound according to claim 1, wherein in formula (I), R represents an ethyl group, R¹ represents a hydrogen atom, and R² represents a hydroxyl group.
7. (Original) The compound according to claim 1, wherein in formula (I), R represents a methyl group, R¹ represents a hydrogen atom, and R² represents a hydroxyl group.
8. (Original) The compound according to claim 1, wherein in formula (I), R represents a methyl group, R¹ represents a methoxy group, and R² represents a hydroxyl group.
9. (Currently Amended) The compound according to claim 1, wherein in formula (I), R represents a methyl group, and R¹ and R² ~~each~~ represent a hydroxyl group each.

10. (Currently Amended) A process for producing the compound according to claim 1, characterized by:

~~cultivating~~ culturing a microorganism having the capability of producing the compound according to claim 1; and

~~recovering~~ isolating the compound according to claim 1 from the culture broth of the microorganism.

11. (Original) An *Aspergillus* sp. F-1491 (FERM BP-8288) strain having the capability of producing the compound according to claim 1.

12. (Currently Amended) An angiogenesis inhibitory agent containing as ~~an active ingredient the compound according to 1 above~~ the compound according to claim 1 as an active ingredient.
